Skills

React.js, Node.js, JavaScript,
Python, HTML, CSS
Azure SQL DB, MySQL
VS Code
Azure

Languages

English (Fluent)
Korean (Fluent)
French (B2)

Achievements

2025 Maters Class representative
2022 Azure Data Engineer associate

Hobbies

Listening to podcasts, calisthenics, guitar

ABOUT ME

Masters student in Computer Science at EPITA, specialising in Software Engineering. Three years of experience as a data engineer/data scientist. I have a strong analytical foundation which comes from my PhD in Mathematics. Now based in France, I'm passionate about software engineering and eager to continue making meaningful contributions in a country I've come to adore. I am currently searching for a 6-month internship from February 2026. I wish to be part of a company where I can contribute and grow.

WORK EXPERIENCE

Data Scientist

Fonterra, New Zealand

SEPT 2023 – JAN 2025

- Developed manufacturing schedule optimiser app using Gurobi, Julia, and Python. Projected to save the company €1,5-5,5 millions per year.
- Implemented and maintained an ETL system crucial for the company using Azure Data Factory and Databricks. Reduced the time of daily update by more than 90
- Developed energy consumption prediction model using random forest regressor, ScikitLearn, Databricks, and MLflow. Projected to save the company €0,2 million per year.

Data Engineer

Luma Analytics, New Zealand

FEB 2022 – SEPT 2023

- Developed robust ETL data pipelines using Data Factory and Databricks in Python, SQL, and Scala to ingest several millions of lines per day.
- Migrated database from SQL DB and blob storage to Azure Data Lake and Synapse Analytics for the largest media company in New Zealand.
- Carried out data analysis queries on Google Big Query in SQL and reported finding with effective Power BI visualisations. This allowed the stakeholder to make datainformed decisions for a popular TV series.

Mathematical Research Scientist

Market Economics Ltd, New Zealand

JAN 2020 – JAN 2022

- Developed several prediction models to forecast economic impact using R and Python. The results were published as articles and reports.

EDUCATION

Master of Computer Science

EPITA FRANCE FEB 2025 – CURRENT

Specialisation in Software Engineering. Class representative

PhD Mathematics

UNIVERSITY OF AUCKLAND NEW ZEALAND FEB 2016 – AUG 2019

Thesis: Approximation errors in nonstationary inverse problems
Research topics include statistical data analysis, machine learning, timeseries analysis, Kalman filter
